AK Racing | 2026 V8 Supercars V2.01

UPDATE CHANGELOG

Version 2.01 brings further improvements, fixes and optimisations across the 2026 V8 Supercars car pack.

Ford Mustang

- Fixed brake lights only partially illuminating under braking.
- Adjusted LOD_B.
- Fixed window decals for Golding and Goodall.
- Fixed liveries clipping or disappearing due to LOD_B.
- Adjusted MoTeC dashboard screen emissive.

Chevrolet Camaro

- Fixed windscreen wiper.
- Fixed DRL emissive.
- Adjusted MoTeC dashboard screen emissive.

Toyota Supra

- Slightly lowered steering wheel placement.
- Fixed sun specular shading on the coolbox.
- Adjusted MoTeC dashboard screen emissive.
- Fixed raindrops appearing on the MoTeC dashboard screen.

All Cars

- Further optimised LODs for improved performance.
- Added mesh templates to each car folder for livery creators.
- AI tyre adjustments and fixes.
- AI behaviour adjustments aimed at improving consistency and overall racing performance.

Known Issues

- An issue where tyre effects cause wheel blur to disappear on AI-controlled cars has been identified and is being investigated.
